Subject: Re: 1459 Vallejo Street - dogs

This was from 8am but they have been there for over 24 hours. My understanding is that there are different addresses within that building and the problem is at 1459 Vallejo, but I can try to confirm in the next day or so. I'm going off what a neighbor had said.

Multiple tenants in my building heard them as early as 4am this morning. Their water bowl appears empty.

Just want to confirm the timestamp of the video you sent us today. We made contact with multiple residents in the complex with address you gave initially.

I am sending ANOTHER video of dogs that have been on the deck for over 12 hours. At this point they have been there for 24 hours and are constantly barking and crying.

Here is footage of them currently. I, along with several neighbors, can attest that they have been out there since at least 4AM.
